

WOODSMOKE REDUCTION PROGRAM
Retention of Existing Wood-Burning Device
Certification Form

The incentive provided to install an electric heat pump is intended to significantly reduce the emissions of greenhouse gases, particulates, and smog-forming pollutants. The Woodsmoke Reduction Program recognizes the need for a reliable heat source and can allow the homeowner or tenant to retain the existing wood-burning device for use only when the heat pump is unable to be used due to a power outage.

Homeowner's or Tenant's name: _____

Address where new device was installed: _____

I certify that the existing wood-burning device will only be used in the event of a power outage when the installed electric heat pump is not operational. (please initial). _____ Yes

Signature (Homeowner/Tenant): _____ Date: _____

Print Name: _____

Title (Homeowner/Tenant): _____
